

STANLEY ETIENNE

Miami Gardens, FL | stanleyetienne.the1@gmail.com | github.com/JwettWuKong | linkedin.com/in/stanley-etienne-74649a24b

PROFESSIONAL SUMMARY

Computer Engineering student who ships real, working software end-to-end — across embedded real-time hardware, full-stack web applications, AI/LLM-integrated agents, and backend data infrastructure. Hands-on experience integrating the Claude API into an autonomous decision-making agent, deploying production web apps, and working with cloud-adjacent backend systems. Fast learner and clear communicator with a track record of leading teams and mentoring others.

TECHNICAL SKILLS

- Languages: Python, C/C++, Assembly (proficient); JavaScript/Node.js; working knowledge of Go, Swift, Java
- AI & LLM Engineering: Claude (Anthropic) API Integration, Agentic Workflows, Prompt Engineering, AI-Assisted Development
- Full-Stack & Backend: Full-Stack Web Development, API Development, Data Pipelines, Linux (Raspberry Pi) Deployment
- Embedded & Real-Time Systems: ESP32, Arduino, Sensor Integration, Circuit Design, FreeRTOS, Interrupts, PWM, ADC
- Communication Protocols: WiFi (HTTP), Bluetooth Low Energy (BLE)
- Blockchain: Solana, Web3 Tooling
- Tools: Git, Arduino IDE, MATLAB, LTSpice

PROJECTS

Veridax | *Full-Stack Web Application* | Python & Node.js | *veridax.app* | github.com/JwettWuKong/veridax

- Designed, built, and deployed a live, production web application from concept through public release, owning the project end-to-end across front end, back end, and deployment.
- Used AI-assisted development tools (Claude Code) to accelerate iteration while maintaining a public GitHub repository for version control.

Cipher Suite / Pulse | *Solana* | *Claude (Anthropic) API* | *Agentic AI*

- Integrated the Claude API to build an autonomous AI agent that makes decisions using real-time, on-chain Solana data.
- Designed the surrounding environment the agent operates within — state, data flow, and decision execution — end to end.

Grid / Cipher Forex | *Electron* | *Node.js* | *Real-Time Data* | *OANDA API*

- Built an Electron desktop application for real-time forex signal processing against the OANDA practice trading environment.
- Implemented a self-learning strategy engine that adjusts trading logic based on the outcomes of past trades, creating an adaptive feedback loop.

Ultrasonic Proximity Security System | *ESP32* | *Embedded Systems* | *IoT* | *Real-Time Processing*

- Designed and implemented a real-time embedded system integrating ultrasonic sensing, LED visualization, LCD display, and wireless communication (WiFi/BLE).
- Engineered a BLE interface and WiFi-based HTTP dashboard for remote monitoring and control, with filtered sensor data for stable, responsive behavior.

Raspberry Pi API Infrastructure | *Backend* | *Data Pipeline* | *Embedded Linux*

- Deployed a Raspberry Pi as an always-on lightweight server that collects and stores data for an AI agent to analyze for downstream applications.

Embedded Systems Lab Projects | *ESP32*

- Built serial communication, PWM motor control, capacitive touch sensing, an ESP32 web server, and multi-threaded FreeRTOS applications across a series of embedded lab projects.

EXPERIENCE & INVOLVEMENT

Innovation Fellow — Center for Innovation, Jackson State University Library (Sept 2026 – Present)

- Selected as a Fellow supporting innovation initiatives and programming through the university library's Center for Innovation.

Founder & Creator — Zoe Time Entertainment LLC — Creative Technology & Digital Media

- Founded and managed a digital media brand focused on content creation and audience engagement; produced and edited video content and developed branding and project execution skills.

Community Assistant — Housing & Residence Life, Jackson State University (May 2023 – Dec 2024)

- Led a residential community, organizing events to enhance student engagement and retention while supporting residents academically and socially.

Upward Bound Tutor/Mentor (TRiO Programs) — Jackson State University (Sept 2022 – Present)

- Provided tutoring across multiple subjects, simplifying complex concepts and mentoring students to improve academic confidence.

ORGANIZATIONS & LEADERSHIP

- National Society of Leadership and Success (NSLS) — Member, 2022–Present. Participated in leadership development and mentorship activities.
- National Society of Black Engineers (NSBE) — Member, JSU Chapter, Sept 2025–Present. Engaged in networking, workshops, and career development events.
- S.T.E.A.M TRIO SSS (Student Support Services) — Participant, Sept 2022–Present. Utilized academic support programs to enhance STEM performance.

EDUCATION

Jackson State University —

Bachelor of Science in Computer Engineering
